

**L'INTERROGATORIO E L'ESAME DELL'IMPUTATO NEL SUO
PROCEDIMENTO**

Mazza O.

Giuffré, Milano, 2004

This book consists of a complete treatment of the active role that the defendant can play with his statements during the proceedings. Therefore, it deals with his rights, with the so-called passive self-defence and his right of self-determination, with a reference also to the right not to issue any statements that can lead to negative effects for him.

From a psychological point of view, it is a necessary source for those who want to study in depth an unknown matter of our literature: preparing the defendant for the trial.
